

ProLine® Residential Electric Water Heater

There's nothing standard about commercial grade.

- Blue Diamond® glass coating is a patented commercial-grade formula that provides superior tank protection and corrosion resistance compared to the industry standard glass lining.
- Coregard™ anode rods feature a stainless-steel core that allows the anode to be secured in place, extending the life of the water heater.
- Enhanced flow brass drain valve is a tamper-resistant, ball-type drain valve that's designed for easy operation.
- Stainless steel heating elements, modeled after those used in the industry-leading commercial line, are built to last with thicker walls and a larger diameter than the heating elements in many competitive products.
- Same commercial-grade thermostats as many of the commercial line water heaters.

What does it mean to be commercial grade?

- As a leader in commercial water heating, American Water Heaters understands the importance of commercial hot water delivery and require the same standard and performance in the residential products.
- Many of the same components that are in commercial water heaters are in residential water heaters and are made in-house at APCOM parts division.
- All products are run through a rigorous quality and endurance testing and inspection, providing a tougher residential product.

A water heater is an investment in your home's value and your family's comfort. Make the easy choice, an American Water Heaters ProLine® Commercial-Grade residential water heater, and get the most for your money.

OTHER FEATURES

ENHANCED HEATING ELEMENTS

- Dual 4500-watt elements for fast recovery and reliable operation. Other element wattages available for order.
- ProLine®: Uses an Incoloy® stainless steel lower element which lasts longer than a standard copper element.
- ProLine® Master: Features both upper and lower Incoloy® stainless steel elements, ensuring even longer life.

DYNACLEAN™ DIFFUSER DIP TUBE

- Reduces lime and sediment buildup and maximizes hot water output.
- Made from long-lasting PEX cross-linked polymer.

PROVEN EFFICIENCY

- Eco-friendly non-CFC foam insulation, heat traps and other features combine to yield a higher Uniform Energy Factor that maximizes savings on operating costs.

COREGARD™ ANODE ROD

- A stainless-steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

HEAT TRAP NIPPLES

- Helps mitigate standby heat loss by reducing the amount of heat lost through the connected pipes.
- Factory-installed for faster installation.

APPROVED FOR MANUFACTURED HOUSING

- All residential electric water heaters are compliant with HUD Standards for mobile homes/manufactured housing.

CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE

6-YEAR (ProLine®) OR 8-YEAR (ProLine® Master) LIMITED TANK AND PARTS WARRANTY
